## Summary

Full Stack Web Developer with a construction background and a desire to learn new things. Excelled at looking at problems from an outside perspective and offering solutions to those problems. Known as someone willing to help anyone that asks, and puts others first.

## Technical Skills

**Languages:** HTML5, CSS3, Javascript, JQuery, and Node Js

## Projects

**GP1** | <https://tinyurl.com/t9f4bb3x> | <https://matthewdherold.github.io/GroupProject/>

Application designed for checking hotel rooms / ratings. Will display a 5-day forecast for the city user is searching for along with hotels in the area based off the chosen filters.

Responsibilities included setting up the weather API for the 5 day forecast feature and assisting other team members in any way necessary.

Languages / tools used for this project include, HTML5, Bulma(css framework), hotels api, openweather api, and Javascript.

**Day Planner** | <https://tinyurl.com/3bbrvpv> | <https://toasted-coder.github.io/portfolio.html>

Application designed for scheduling during a 9-5 work day. Displays future schedule in green, current in red, and grey for when user has passed that time already.

Languages / tools used for this project include, HTML5, Javascript, and CSS3.

**Coding-Quiz** | <https://tinyurl.com/3t8trbf6> | <https://toasted-coder.github.io/portfolio.html>

Application designed to test users "coding knowledge" by running a timed quiz game. Time is deducted from counter any time a wrong answer is received. Includes a high score list at end of quiz.

Languages / tools used for this project include, HTML5, Javascript, and CSS3.

### **Experience**

#### **Traffic Control Technician/ Supervisor    2018-2020 Stockton, CA**

Responsibilities included flagging road closures, which required clear and constant communication. General labor required some critical thinking / planning to make sure the jobs get done quickly and properly. As a supervisor, set up road closures, communicated with other foreman on the job to decide game plan for that shift, and filled out necessary paperwork for whatever job currently stationed at.

#### *Key Accomplishments:*

- Traffic Control Technician certification
- Traffic Control Supervisor certification
- Flagger card (used to be required to be able to flag on the job)

### **Education**

Currently attending Full Stack Web Development bootcamp at UC Davis, Davis, CA.
